

january 27 2003 Variola does not exist any more in a natural state but indeed in the laboratories of the american army

USA want to subject the European countries to a forced vaccination which would lead thousands of dead and million patients

We are able to get influence on national and international activities if we get to know it soon enough. In spring 2003 we got the following situation:

2003 Germany - the German government is storing 100 million units of vaccine against variola and plans the obligatory vaccination of all Germans, possibly under cover of a new Law. Variola does not exist any more in a natural state but indeed in the laboratories of the US army. In the night of the 21.1.03 the chain CNN and German television ntv (share of CNN) have shown that the american troops are already charging their planes on one hand with biological weapons with variola and on the other hand with product of vaccination for their soldiers. They confirmed that they wished to use the biological grenades in Iraq " in defense ".

Whereas here in Germany the government says that it is necessary to be afraid of the terrorists because they can use bombs of variola, in verity its an arrangement of the German army to deal with the American soldiers who would be wounded, with responsibility to get the wounded US-soldiers out of Iraq. Germany is afraid that the US planes soaked with bacteriological dust and the infected American soldiers would arrive.

Beyond its official declarations, to vaccinate 82 million Germans and all people who would pass by Germany, the biological war is already in preparation. The German planes of medical department are already over there in Beirut to serve the US soldiers.

On 10.000 vaccinated possible, this vaccination would result in the death of 1 person and 300 others would fall sick. In other words on the whole of the population generalized vaccination will lead to dead of 8.200 German and would cause a serious disease to 2,4 million citizens. Vaccination against variola involves an ignition of the brain which can cause a dimension of immense debility - idiocy in particular on the whole grandchildren, which should be treated for all the remainder of their life and would not have the chance of normal development. This immense catastrophe which would occur in Germany would induce also obviously dramas with the whole of the countries of Europe.

Those which plan these actions of anti variola vaccination in Europe would manage to make Germany and other countries in order " to go well online with US Army" according to wishes of Bush and his gangsters of oil. Fact is that the German government already states to have stored 20 million units of vaccine confirms that it wants to start to vaccinate when they have necessary stock for all Germans (reserve of 100 million units) i.e. in April 2003. (tele information was disseminated in the night of the 21.1. between 23h00 and 24h00 H but was not repeated the following day, at once being exerted control).

2005 - I have distributed this top information to a lot of people. For exemple the students of Muenster University took over this information and collected within one week 1000 subscriptions against these vaccinations. Two weeks later the whole show was once more in TV. Our German minister of Health Mrs. Schmidt did not know what to say ... finally she said, they will think over their project, and they will realize it in autumn... and then we never heard about once again!

This was really a good exemple that we are able to do something. The informations about this dangerous attack against our people came out to early, we have distributed it, and they were not able to realize it! That's the way we shall take care for our own interest and for the security of our future.

Instead of this idiot vaccination the pharma industries have realized in 2004 the new world wide idiot programm of producing vaccinations against influenza (grip) in forward to what may come – because influenza is changing by mutations every year... but how do they know in forward which kind of genetic changes this virus will make?! Or do they develope and distribute it themselves? I don't beleave in the virus-grip at all. The grip is only a result of living conditions in winter in our dry, central heated rooms, and a lack of vitamins and sunlight! It's the vaccination which makes thousands of people ill!

D. Harald Alke, *biological technician in microbiology*
